

SPE ICoTA 25th European Well Intervention Conference

Student Visit

Organisers

14 Nov 2019

The Event Complex Aberdeen (TECA), AB21 9FX

ICoTA 25

Now in its 25th year, the SPE ICoTA European Well Intervention Conference is Europe's premier forum for the exchange and discussion of the latest developments in well intervention and coil tubing techniques and technologies. The theme this year is 'ICoTA 25: Industry Collaboration to Restore, Safeguard & Optimise Production Across Europe'.

SPE Aberdeen & ICoTA Europe recognises the importance of STEM subjects to the future of the oil and gas sector and the role they play in contributing vital skills and knowledge to the workforce. We are extending an invitation to college and university students to attend the conference on the 14th of November.

A visit to the conference and exhibition will provide:

- Access to over 40 exhibitors, including operators and service companies.
- A great opportunity to form links with exhibiting companies and industry professionals, which will be highly beneficial for your future career.
- An opportunity to visit the ICoTA Operator Stand where around 10 different operators will be present to discuss any questions you may have about the industry.
- A chance to listen to an informative presentation and take some industry knowledge home with you.

Itinerary

- 1.30pm - Arrival & Registration
- Training Presentation
- Guided tour of the exhibition and opportunity to discuss oil and gas industry opportunities and current challenges.

Registration

This event is free to attend. To register your interest, please email icota@mearns-gill.com quoting "14 November Student Visit". All places will be allocated on a first come, first served basis.

"I think students should consider a career in well intervention as it is a vital part of ensuring UK oil and gas production is maintained. With the ageing basin there will be less and less new big drilling prospects and focus will turn to squeezing as much out of existing assets as possible."
